

Real-world identity for AI agents.

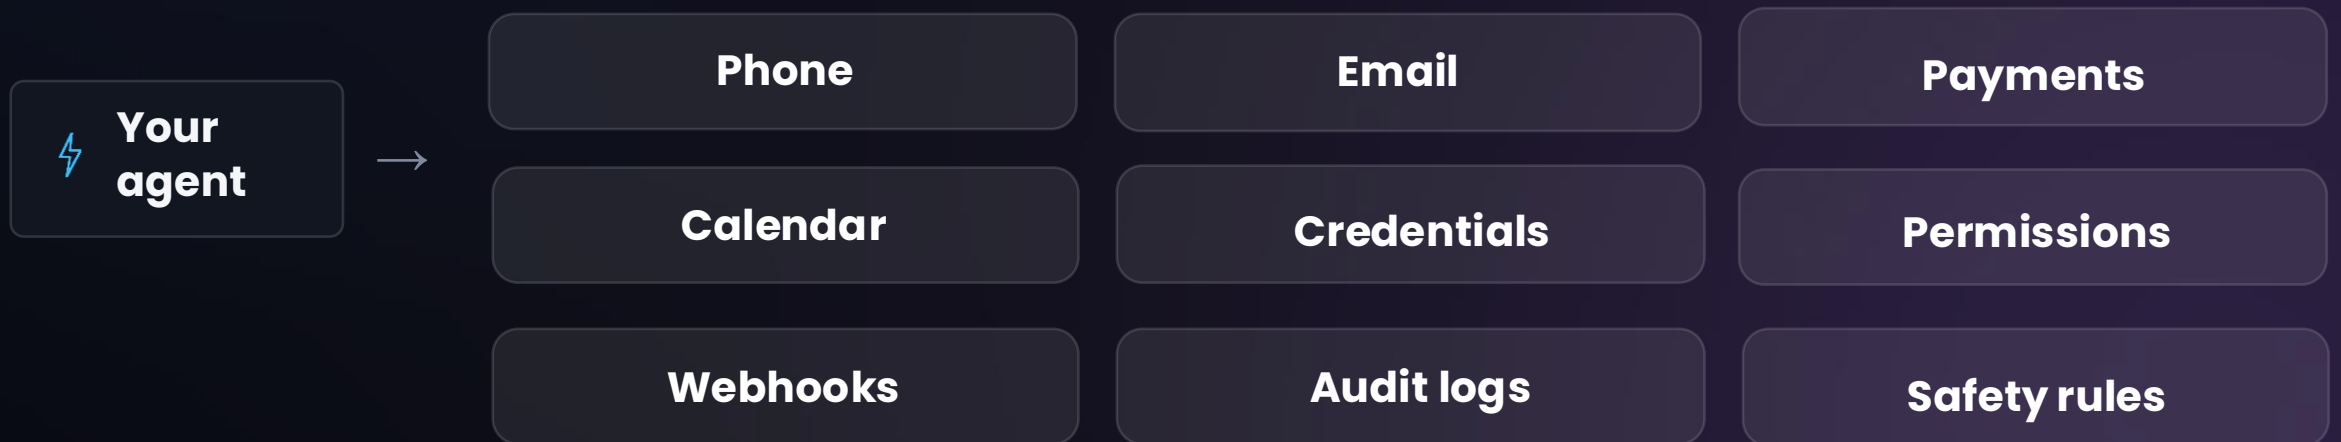

aidentity.space

**AI agents can think.
They still can't act.**

Today, you wire the real world together by hand.

One identity, under a minute.

Aldentity gives every agent an own real-world identity.

REACH

- **Phone number** Call and text real people
- **Email inbox** Send and receive on its own
- **Payment card** Pay with built-in limits

CONTROL

- **Permissions** What it can and cannot do
- **Spend limits** Hard caps, per agent
- **Full audit log** Every action, traced

The money rails are ready.

Visa, Mastercard and Stripe all shipped payment rails for AI-agents in 2025-2026.

\$ 1T

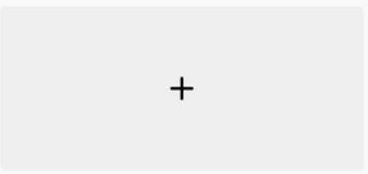

in US AI-Agent transactions
projected by 2030 – *McKinsey*

35 %

of companies couldn't shut down a
rogue AI agent – *Deloitte*

OPENCLAW LINKED

Connect OpenClaw

Use an existing OpenClaw instance, or let Aidentity deploy one with the identity layer already installed.

Existing instance
Paste a prompt into OpenClaw and wait for the skill to confirm linking.

Deploy for me
Provision a managed OpenClaw instance with the identity layer preinstalled.

ink.managed-openclaw.aidentity.space

Deploy identity

Identity ready

This agent identity now has a phone number, inbox, payment card, calendar, and OpenClaw link.

We make a money as agents act.

01 · SUBSCRIPTION

Per agent identity

A monthly fee for each agent's identity, permissions and audit log.

02 · USAGE

On every action

A margin on the calls, emails and payments it makes.

03 · PLATFORM

For whole teams

Permissions, budgets, audit and SSO across many agents.

Every agent that acts will need an identity.

Identity is the identity and control layer for the autonomous economy..

01 · SINGLE AGENTS AT WORK

People give one agent a phone, email and card to get things done

02 · FLEETS IN EVERY COMPANY

Businesses run many agents that act and transact and must control them.

03 · ROBOTICS AND HOME AGENTS

Trillions in agent transactions, each one needing an identity to run on.

Builders who ship.
